ADVANCE MEGA MENU

Biztech Consultancy has come up with one of a kind solution for Online Store owners in the form of Advance Mega Menu which is helpful for Store owners to represent the product categories and sub categories that they have in store for the customers.

This module comes with the feature of Website Mega Menu which means store owner can define a simple menu as a mega menu in which owner can show lots of categories in a single menu.

In website frontend, we have developed a mega menu which will fetch the category details from back end and show it according to the mega menu configurations. (i.e., 2 columns menu, 3 columns menu or, 4 columns menu, want to set background color or image, want to set main menu icon, want to show slider, want to set slider position, want to set footer of mega menu).

1 Benefits of Advance Mega Menu

- Easy & effective management for Product Display.
- You can rename your category list as per your desire.
- Admin can select number of columns for menu drop down.
- Admin can set images for highly recommended products.
- Creates effortless choices for customers.

2 Features

2.1 Back-End Admin Features

2.1.1 Define Mega Menus for the Web Site

- Admin can create and add Multiple Mega Menus for the website.
- They can also change the order of the Mega Menu in site.
